Solar
Carport

Carport: Multibay

Designed for commercial and retail settings, the Batri Multibay Carports provide solar EV charging for multiple vehicles and battery storage, bringing energy flexibility to spaces and organisations. Available in 7 kW fast charge, 50 kW and 150 kW DC super charger configurations.

Scalable in size and design, we work closely with clients to plan, install, commission, and maintain Batri Carports. Site-specific income generation and commercial models are available along with carbon mitigation models for net-zero reporting.

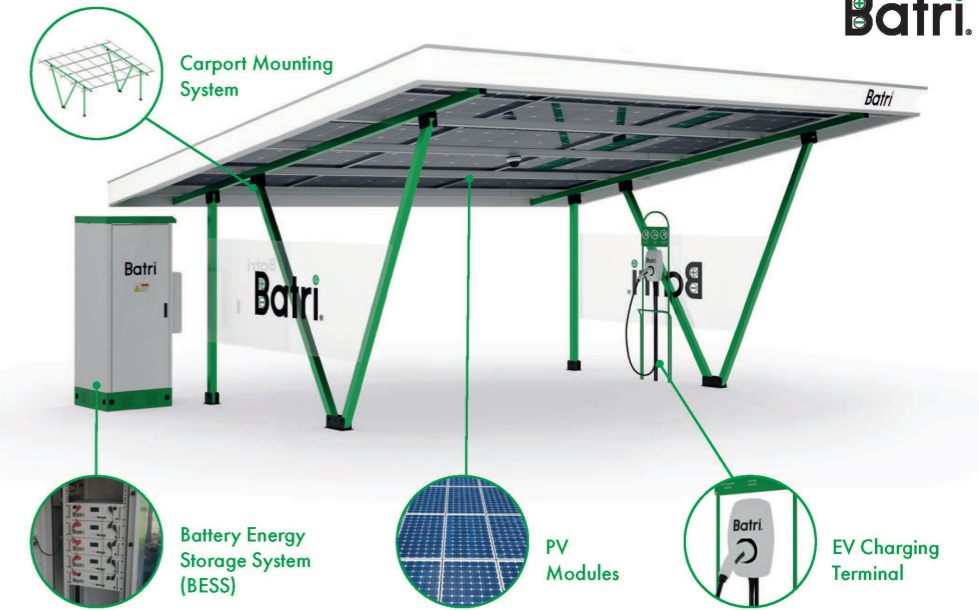

Solar Carport

Batri offers a custom line of Solar Carports designed to utilise existing parking areas and generate power without sacrificing valuable real estate. Typically offered as an on-grid solution, our innovative Carport systems deliver a cross-platform solution, combining energy generation and an elegant shading/weather protection canopy for vehicles.

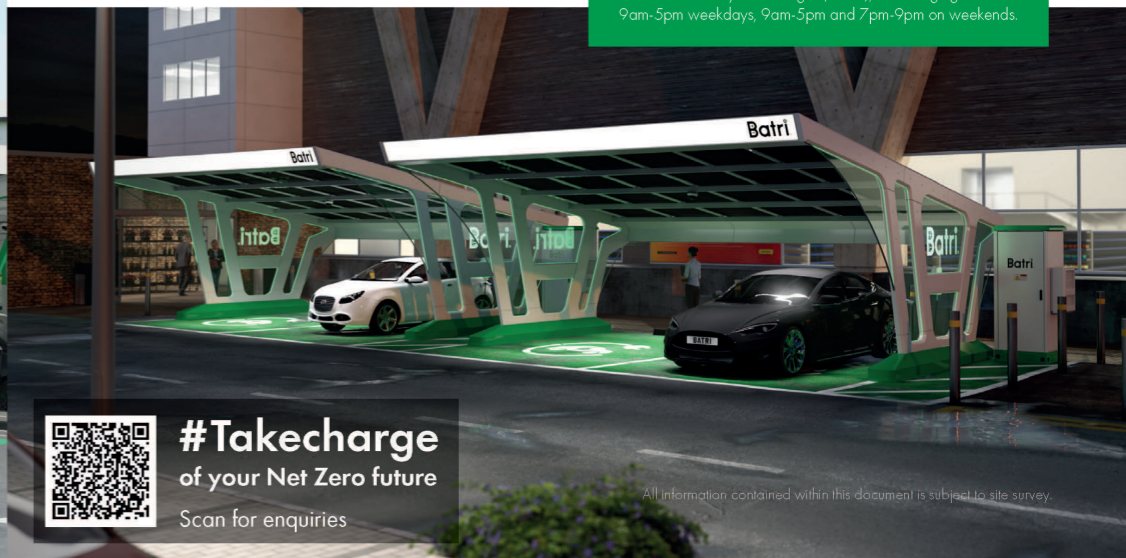

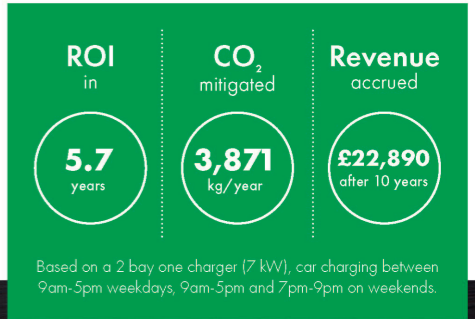

Designed around our all-in-one technology solution, Batri Solar Carport systems have been structurally engineered to guarantee optimum corrosion and wind resistance, while offering a robust performance-to-price ratio. Offered with a standard aluminium construction or a customisable architectural design, our solar carports are compatible with most electric vehicle charging stations.

Options for the Solar Carport include:

-  Powder coat finish
-  LED motion controlled lighting
-  Boxing & plating
-  CCTV installation
-  Cable management
-  Advertising & branding
-  Guttering
-  EV charging points
-  Water management
-  Energy storage

- Available in a variety of sizes and styles, from standard to bespoke architectural designs
- Easy and quick to install and maintain
- 7 kW fast charge, 50 kW and 150 kW DC super charger configurations
- Guaranteed for 20 years
- Available now
